COUNTS**

Who We Are

At Aqua Controllers Ltd, our Service Department blends technical expertise with a customer-first ethos to keep your water and wellness systems operating at their best. From private residences, luxury hotels, apartment complexes to sport centres and industrial facilities, we deliver tailored maintenance and facilities management programmes that prioritise safety, efficiency and reliability. Our proactive approach minimises downtime and maximises the lifespan of your equipment—so you can focus on what matters most.

Why Choose us?

- Certified technicians with specialised water-system expertise
- Flexible, tailored maintenance contracts to suit your budget and schedule
- Top-quality tools, diagnostic equipment and genuine spare parts
- Local and regional support across Mauritius, Seychelles and Madagascar
- Trusted by major hotels, developers and homeowners for reliability and excellence

OUR CORE SERVICES

Routine Maintenance Services

We provide comprehensive pools, ponds, fountains, water and wastewater treatment plants routine maintenance services including vacuuming, brushing, debris removal, chemical balancing, filter backwashing, as well as dosing systems and treatment process verifications.

Preventive Maintenance Packages

We design and implement scheduled service visits that include full system inspections, performance optimisation, equipment calibration and detailed reporting. By identifying wear and tear early, we prevent costly breakdowns and ensure uninterrupted operation.

Facilities Management

Choose a fully managed solution with bespoke maintenance packages, asset-tracking dashboards and scheduled performance reports. We handle preventive planning, regulatory compliance and on-site coordination so your water installations run smoothly and safely.

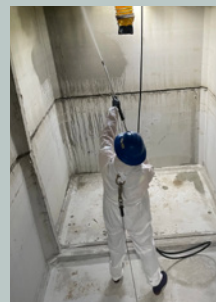

On-Call Repairs & Troubleshooting

When faults arise, our rapid-response team is on hand to diagnose issues, replacement faulty components with genuine spare parts and restore system performance. Skilled technicians use the latest diagnostic tools to deliver fast, effective solutions.

Water System Upkeep

From pumps and filtration units to control panels, automation systems and pressure-boosting installations, we maintain every component of your water infrastructure. Regular upkeep ensures consistent water quality, reliable flow rates and compliance with local standards.

Potable Water Tank Cleaning & Disinfection

Clean water begins at the source. Our certified process includes:

- Full emptying and sludge removal
- Mechanical scrubbing of walls and floors
- Disinfection with approved, non-toxic agents
- Final rinse and safe re-commissioning
- Issuance of a compliance certificate
